Digital Cycle Counter Kits

DIAPHRAGM PUMP ACCESSORY

The ARO® Cycle Counters Kits provides an accurate way to count pump cycles to help establish and sustain a preventative maintenance program. The cycle counter can be mounted on the pump with the provided enclosure or remotely mounted in a separate panel up to 25 ft. (7.6m) away. The unit uses a magnet located at the end of the major air valve and hall effect sensor to register a complete pump cycle.

- Easy to Install, no drilling or tapping needed to install kit
- Lithium Battery Based Counter with 7-10 years battery life
- Enclosure and counter meets NEMA 4X/ IP65 specification
- Large 0.35" (8.9 mm) character height on LCD display
- Front reset button can be disabled to prevent unattended resets
- Corrosion resistant stainless steel mounting bracket and hardware
